# WAP User Agent strings and profiles

for Sony Ericsson phones

Sony Ericsson

# Preface

## Purpose of this document

This document describes WAP User Agent strings and profiles (UAPProf) for Sony Ericsson mobile phones. The UAPProf is an Open Mobile Alliance (OMA) specification that allows a WAP browser in the phone to deliver device profile information to a serving web server. The profile information includes hardware characteristics, user agent information, the network capabilities of the client, the WAP characteristics and the software platform.

For more information about UAPProf, see the OMA standard specifications.

# User Agent strings and profiles

## Overview

The UAProf functionality makes it possible for servers, for example, MMS servers and Web servers, to get information about the mobile phone capabilities. The User Agent string in the handset contains the required information for the server to identify the proper UAProf file and access capability information for the specific handset.

The capability information can be hardware related, for example screen size, or software related, for example MMS features, name and version of the Web browser and details about the Java implementation in the phone. The UAProf information can be used by servers to make proper content adaptation of MMS messages or Web pages for the actual phone model.

Sony Ericsson has several user agent formats. The profile version (if present) indicates what characteristics the browser supports.

**Note:** The SW version attribute is an initial version and may change as the phone software is revised and updated after the initial release.

## Phones with NetFront™ browser

The User Agent string is provided in the format:

<Product Name>/<software version> Browser/NetFront/<profile version> Profile/MIDP-<version> Configuration/CLDC-<version>

*Example:*

SonyEricssonW600i/R7B Browser/NetFront/3.3 Profile/MIDP-2.0 Configuration/CLDC-1.1

In phones implementing Sony Ericsson Java Platform JP-8.2 or higher, the User Agent string format is:

<Product Name>/<software version> Browser/NetFront/<profile version> Profile/MIDP-<version> Configuration/CLDC-<version> JavaPlatform/JP-[X].[Y]

*Example:*

SonyEricssonW980/R1x Browser/NetFront/3.4 Profile/MIDP-2.1 Configuration/CLDC-1.1 JavaPlatform/JP-8.3

## Phones with Sony Ericsson browser

<Product Name>/<software version> Browser/<SEMC-Browser>/<profile version>  
Profile/MIDP-<version> Configuration/CLDC-<version>

*Example:*

SonyEricssonW800i/R1L Browser/SEMC-Browser/4.2 Profile/MIDP-2.0 Configuration/  
CLDC-1.1

## Entry level phones

<Product Name>/<software version>

*Example:*

SonyEricssonZ200/R101

## Symbian™ 9 / UIQ 3 phones

The User Agent string is normally provided in the format:

<Product Name>/<software version> Profile/MIDP-<version> Configuration/CLDC-
