Tutorial | Hiding Images From The A2 Media Menu

To hide single images in menu, just remove your image's EXIF data (dirty method)

customize_upgrade.xml solution, which goes in TPA/PRESET/CUSTOM

Remove the Pictures and Videos sections of the media menu with this customize_upgrade.xml

```
<?xml version="1.0" encoding="UTF-8"?>
 <!-- customize_upgrade.xml by Lynott with credits to diezil -->
<customization>
  <registry>
        <mediacenter>
          <settings reg-path="/apps/mediacenter">
                <orientation type="uint">0</orientation>
                 <auto-rotate type="bool">false</auto-rotate>
                  <mainmenu>
                   <order type="wstr">Music,Settings</order>
                  <focus type="wstr">Music</focus>
                </mainmenu>
          </settings>
        </mediacenter>
 </registry>
</customization>
```
