xitt
1. Download this (or find it in the content folder)
2. Install jjpatcher.
3. After installed, move it to the phone memory.
4. By sefp v2 go to the tpa/preset/custom
5. Upload customize_upgade.xml
6. Turn On mobile phone.
7. On folder "Other" in phone memory we have file jabxxxxxxxxxx.b (xxx the different characters).
8. Copy this file on computer.
9. Drag this on program bpatch
10. By sefp v2 go on the tpa/preset/system/ams and throw file jabxxxxxxxxxx.b
11. On memory card/other create folder "patches"
12. Put your patches there.
13. Turn ON jjpatcher.

Just patched phone..
