Theonewithideas

In this tutorial I'll show you how to change the illumination of LEDs on the sides of W580/S500 in skin when entering Walkman

You need:
-Flash CS3 or better

1.Download and open PlayView_Background.fla (in the Useful Content folder)
2.Click on canvas
3.Press Ctrl+R
4.Choose the "PlayView_Background.png" you would normally use in your Walkman.
5.Click "Open"
(Now the image should appear on the white canvas)
6.Select "Action Layer"
7.Press F9
8.Change the RGB values in line 2 to your wish
9.Now click File>Export>Export movie
There you have it,skin that have custom illumination color!
10.To finish,open up skin.xml file from your skin folder:
11.Edit

```
<image id="audio.background" filename="PlayView_Background.png"/>
```

to

```
<image id="audio.background" filename="PlayView_Background.swf"/>
```

12.Save edited file
13.Put the skin folder like normal skin folder.
And you're done!

Also notice, the image in Flash will have slightly less quality than the original graphic.
